

Czech University of Life Sciences Prague (CZU Prague)

The Czech University of Life Sciences Prague (CZU) leads students to responsibility and respect for the environment in the interest of the sustainable life of future generations. This approach plays a crucial role in today's global situation, where natural resources are depleted at an alarming rate, and the biodiversity of our planet is seriously threatened. CZU is located in Prague, capital of the Czech Republic, on a modern green campus. Being member of the Euroleague for Life Sciences, it is one of the leading European universities focusing on life sciences. CZU also achieves excellent results in prestigious international rankings (THE, QS, AWRU, US NeWs BQUR). It is also rated as the most sustainable university in the Czech Republic. CZU Prague is a leading educational and research centre in the areas of forestry, environmental sciences, agricultural sector, sustainable use of natural resources, management and informatics, technology and regional development. In 2018, the CZU received institutional accreditation, which proves that the university meets all quality assurance standards.
